Pumice rods and collector grindstones

Mack

Carbon brushes • Carbon brush holders

Good contacts

Stripping, smoothing, polishing, grinding: Good contact is essential for optimum transmission. We offer our customers lots of helpful material here.

Our pumice rods help you to adjust the run surface of the carbon brushes exactly to the radius of the contact surface, and to produce the required degree of roughness. In this way optimum conditions for the best run results can be created right from the beginning.

Whether it's solid grindstones in different grains or flexible rubber-bound polishing rods:
At MACK, you can enjoy a rich assortment of versions, sizes, and materials for the smoothing and polishing of slip rings and collectors.

Collector grindstones

Type number	Variation	Grindstone dimensions (mm)	Grain
AGP 119	0	30 x 14 x 30	medium
AGP 122	1	10 x 8 x 10	medium
AGP 125	1	15 x 15 x 15	medium
AGP 128	1	20 x 20 x 20	medium
AGP 131	2	32 x 25 x 32	medium
AGP 134	3	40 x 25 x 40	medium
AGP 137	3	40 x 40 x 40	medium
AGP 140	3	75 x 50 x 50	medium
AGP 143	3	75 x 75 x 50	medium
AGP 146	3	100 x 50 x 50	medium
AGP 149	3	100 x 75 x 50	medium
AGP 152	3	125 x 75 x 50	medium
AGP 155	4	75 x 50 x 50	medium
AGP 158	4	75 x 75 x 50	medium
AGP 161	5	125 x 75 x 50	medium
AGP 164	5	150 x 75 x 50	medium
AGP 167	6	200 x 100 x 75	medium
AGP 170	6	220 x 110 x 75	medium
AGP 173	6	150 x 140 x 75	medium
AGP 176	6	230 x 130 x 75	medium
AGP 179	6	230 x 150 x 75	medium
